ΡΕΜΚΟ

ABOUT THE PEMKO PRODUCT LINE

Since 1952, the Pemko name has been known as a key manufacturer in weatherstripping products. Over the years, as an ASSA ABLOY Group brand, we have expanded our product line into a full line of architectural door trim products to include thresholds, fire/smoke gaskets, door bottoms, perimeter gasketing, brush seals, astragals, continuous geared and stainless steel hinges, fire and life-safety products, lites and louvers, and sliding door hardware.

The Pemko product line offers sound-tested, smoke-labeled, fire-labeled, skid resistant, and ADA-compliant products, and aggressively pursues new product development to create solutions for new applications and requirements.

Applications

- Energy Efficiency: These products make a complete energy efficient door solution door bottoms, astragals, meeting stiles, brush gasketing, perimeter gasketing, and thermal barrier thresholds.
- Smoke and Fire Gasketing: Hot Smoke Seal[™] is an intumescent fire life-safety product that meets UBC7-2 (proposed UL10C) positive pressure testing. Pemko S88 and S773 silicone seals are also smoke and fire rated gaskets that meet UBC7-2 positive pressure testing and are Category G gaskets for edge sealing systems for use with Category B doors.
- Pemko Acoustic Solutions: As a result of extensive acoustic testing, our gasketing systems are used on openings with STC Ratings from the low-30's and into the mid-50's. Acoustic seal sets have been assembled to better assist with determining an operable rating when a door's sealed-in-place rating is known. See pages 222 to 224 for more info.
- Electrically Modified Pemko Hinges: Continuous geared hinges are designed for commercial doors of all traffic levels and offer many benefits for your opening. All of our commercial-grade continuous geared hinges have the added option for electrical modification. Some of these options allow for electrical modifications to be made without removing the door from the opening.
- ADA-compliant aluminum and rubber ramps provide wheelchair access in public access doorways.
- Sustainability: Products are certified to GREENGUARD GOLD standards for low chemical emissions into indoor air during product usage.

All products in the Pemko line undergo rigorous testing to ensure that they meet or exceed the industry standards. Look for the logos next to the product drawings and see pages 12-13 for more information.

LEED Certification Contribution

ASSA ABLOY can help to achieve prerequisites and accumulate points in several categories and credit areas for LEED. For further information, please call 1-800-824-3018 or refer to our website to view our prepared LEED statement.

U.S. Green Building Council logo is a trademark owned by the U.S. Green Building Council and is used with permission. ASSA ABLOY is a member of the USGBC and CaGBC

Sales & Support

Customer Service Representatives are available from 7am to 7pm Central time at 1-800-824-3018 or visit the website for the current catalogs, sell sheets, and the most up-to-date templates.

There are many items on the Pemko Quick Ship Program that ship within 48 hours. For the most up-to-date information, visit the Accessories WebShop at https://accessories.assaabloy.com/en/accessories. Customers with established Pemko accounts may request an account in WebShop through Pemko's Customer Service Representatives.

Need a Sales Rep?

Pemko is represented by the ASSA ABLOY Door Security Solutions team Contact your local ASSA ABLOY Door Security Solution Representative via e-mail by going to **www.assaabloydss.com** and clicking on "Sales Support" or call 1-800-DSS-EZ4U (800-377-3948).

GENERAL INFORMATION AND TERMS

Terms:

All prices are F.O.B. factory. To customers with satisfactory and / or prior approved credit and account status, terms of 1% 15 days, NET 30 days will be allowed. To open a new Pemko account, please contact your local Door Security Solutions Sales agency. Acceptance of orders and deliveries are subject to our approval.

Credit Card Capabilities:

Visa, Mastercard, Discover, and American Express are accepted (only for established open accounts). Payment terms are NET.

Freight Terms:

For freight policy terms & conditions please click here or see brand price book.

Oversized/Special Packaging:

\$100.00 NET. This will be added to any order not meeting prepaid freight where the product is a) over 10 feet in length, b) a welded threshold assembly, or c) as deemed appropriate to ensure product safety while in transit.

Minimum Order Level:

A surcharge of \$15.00 all will be added to NET orders less than \$100.00 NET.

Returns And Allowances:

No merchandise will be accepted for return or credit unless prior written approval is obtained. Returned merchandise must be of recent sale (6 months), in restockable / resalable quality, size, and condition. A minimum 25% charge plus freight charges will be made for returns. Material that is not in standard stock sizes, is made to special order, has a custom finish, or has been sold at special consideration or closeout is subject to additional charges. Foam tape is not returnable. Adhesive gasket may only be returned within six (6) months from the ship date.

Contact Customer Service for rules and Return Goods Authorization paperwork.

Cancellation Charges:

Cancellation of special order material, non-stock sizes, or special sizes are subject to cancellation charges, based on factory expense and material used.

Guarantee:

Pemko products are guaranteed for five (5) years against defects in material or workmanship, except: 1) PemKote abrasive surface for thresholds is guaranteed for ten (10) years. 2) Polyurethane foam tapes are guaranteed for 90 days. 3) Grade 1 PemkoHinges are guaranteed for the life of the opening against defects in material or workmanship. All other grades of PemkoHinge carry a ten (10) year warranty. 4) Electrical modification performance is guaranteed for one (1) year on Standard Duty Grade 1 (HDI) and 1100 Series hinges. 5) PC Henderson products are guaranteed for two (2) years against defects in material workmanship. 6) Powder Coated finishes are warranted for two (2) years; normal wear is not included in coverage.

Markar Continuous Hinges and Pivots are guaranteed to be free from defects in materials and workmanship for a period of 10 years. Hinges with medical bearings are guaranteed for twenty-five (25) years. Markar Edge Guards and Astragals are guaranteed to be free from defects in materials and workmanship for a period of (1) year. Markar electrical modification performance is guaranteed for five (5) years.

Pemko Manufacturing Co. will not be liable for defects or damages arising from improper installation, product modification, incorrect application or storage of product. Written notice of damages must occur within the warranty period. Liability shall be limited to the replacement of product or component determined to be defective and shall not include costs arising from removal or reinstallation of product. Cost of replacement shall not exceed original purchase price. No other claims will be allowed. In no event shall liability be extended to include punitive, incidental or consequential damages arising from use of Pemko products. This is the sole warranty given by Pemko Manufacturing Co.. No other warranty implied or expressed shall be allowed.

Claims For Shortage Or Damage In Transit:

All claims must be made within ten (10) days of receipt of goods. Purchaser assumes the risk of loss or damage in transit.

Mill Lengths:

Most extrusions are available in mill lengths. Cut lengths over 12 feet are charged as mill lengths.

800-824-3018 | www.pemko.com Check the web site for the up-to-date catalog

GENERAL INFORMATION AND TERMS

Ordering Information:

Please order material by product number, specifying length required per piece and the number of pieces. Most weatherstrips are offered in standard sizes. If it is not practical to furnish the size ordered, the next larger size will be furnished and charged. Thresholds are maintained in standard sizes with 1/2" extra length on thresholds thru 47" and 1" extra length for thresholds 48" and longer to allow for fitting and field trim, unless exact net cut size is specified. Cut lengths under 24" will be charged as 24".

Thresholds, perimeter gaskets, astragals, and door bottoms are <u>punched or drilled as standard</u>, unless otherwise specified in this catalog. Material can generally be supplied without holes by stating "No Holes" on the applicable purchase order line.

Thresholds are punched with 12" centers. Thresholds over 8" in width will be punched with a double row. Thesholds are generally supplied with #10 flat head screws. Other fasteners are available on request.

Metal retainers for perimeter gaskets, door bottoms, and astragals are punched with 6" centers.

Non-Stock Finish Information:

Some items shown in this catalog are not stocked in certain finishes (i.e. BDG, G, PW, and SN). 'Batch charges' may be required on non-stock finishes to achieve our normally fast lead times. Contact Customer Service for a quotation and lead time.

Option Tables:

The option tables are provided for selection of other than standard or normal finishes, components, fabrication, or fasteners. Since these are other than standard or normal, please allow for extra lead time for option(s) selected.

Cutting Tolerances:

Elastometric: -0 + 2" (50.8mm) Thresholds (up to 48"): + 1/2" (12.7mm) Thresholds (48" and up): +1" (25.4mm) Net Cut: +/- 0.060, ¹/₁₆" (1.5mm) Hinges: +/- 0.032, ¹/₃₂" (0.8mm) Automatic Door Bottoms: +/- 0.060, ¹/₁₆" (1.5mm)

Orders are subject to acceptance by Pemko Manufacturing Co. All prices and terms are subject to change without notice.

How to Order (Product Number Designations):

When placing your order, please specify the product profile number, finish, insert and size/length. Also make sure to clearly state any special fabrication needs, optional fasteners or custom finishes/sizes required.

Throughout the catalog, products are listed with an underscore (_) where variable finishes are available. More in-depth ordering information for specific lines is available in the individual product sections of the catalog.

Standard Products:

Example: 2005 A T 36 (Shown as 2005_T in catalog)

Profile#:	: Finish:	Insert:	Size/Length:
2005 216 297	A SN BDG	T = ThermoSeal PK = PemkoPrene® V = Eco-V™	48 = 48" 3684 = 1 piece @ 36"
303	А	S=Silicone	+ 2 pieces @ 84" 84/2 = 2 pieces @ 84"

Adhesive	Gasketing	Products:
Addiesive	Gusketing	i i ouucus.

Example: S773 D 21 (Shown as S773_ in catalog)

Profile#: Finish:	Size/Length:
S773 D	21 = 21' coil
PK55 BL	510 = 510' (bulk packaging)
S88 W	17 = 17' coil

For PemkoHinge® and Modular Ramps, see detailed ordering information in their individual catalog sections.

MATERIALS AND FINISHES INFORMATION

Metals:

Extruded metal products are made from 6063 aluminum alloy or CDA alloy C38500 architectural bronze (brass). Roll-formed metal products are made from steel, 70-30 yellow brass, or 85-15 red brass. Roll-formed aluminum weatherstripping is produced from various alloys selected for the particular properties required. See finishes information below for all finish designations. If you do not see the option you require, please inquire with our Customer Service Department about the feasibility of a custom finish.

Drawings:

Product drawings throughout the catalog may be a reduced representation/not drawn to scale. They are representations of the product size, dimensions, shape, etc. For scale drawings in PDF or AutoCAD (DWG or DXF) format, please visit our website: **www.pemko.com**

PRODUCT TESTING/CLASSIFICATION SYMBOLS

These symbols are shown adjacent to products throughout the catalog so that one can readily identify and select products which meet specification and/or code requirements.

GREENGUARD GOLD Certification:

Tested To: UL2818 GREENGUARD GOLD Certified products are certified to GREENGUARD GOLD standards for low chemical emissions into indoor air during product usage. For more information, visit **ul.com/gg** or **spot.ul.com** for Pemko's GreenGuard listing.

Air Infiltration Tested

Tested To: ASTM E-283-04 (2012)

Products indicated by this symbol have been air infiltration tested in accordance with the requirements of ASTM E-283 Rate of Air Leakage Through Exterior Windows, Curtain Walls, and Doors.

Sound Tested

Tested To: ASTM E 90-2009

Products indicated by this symbol have been acoustically tested in accordance with ASTM E 90-2009. Method for Laboratory Measurement of Airborne Sound Transmission Loss of Building Partitions Tests were conducted by accredited laboratories for acoustic testing. Contact your Door Security Solutions Sales rep or Pemko Customer Service for recommended PEMKOSTCSET kits.

Barrier-Free

Meets Requirements of: ADAAG-2010 (Amended) and ICC / ANSI A117.1-2017

Products indicated by this symbol are access compliant by having installed height differences not over ν_2 " with allowable edge and slope conditions. All ramp products (found in the Modular Ramp section) have ADA compliant 1:12 slopes: Pemko Modular Ramp Thresholds, Rubber Ramp Thresholds and Recycled Rubber Ramps. Contact Pemko Manufacturing or refer to page 14 for recommended Barrier-Free Systems.

Non-Skid/PemKote[™]

Meets Requirements of: ASTM D 2047, UL 410 & Federal Specifications P-F-430C

PemKote[™] is a rugged abrasive finish of nickel-aluminum composite which is fused to the metal surface by an exothermic reaction. This process produces an aesthetically pleasing skid resistant coating with extremely high bond strength and excellent resistance to oxidation. PemKote[™] carries a TEN (10) YEAR GUARANTEE, and is available on all Pemko line metal thresholds and metal modular ramps. ASSA ABLOY highly recommends the use of PemKote[™] for all Barrier-Free Modular Ramps and as a durable, economical alternative for cast abrasive products.

X

Smoke Tested

Tested To: UL 1784 Meets Requirements of: NFPA 105-2013

Products indicated by this symbol are Listed by WYLE Laboratories as having been tested in accordance with Underwriters Laboratories Inc.®, Standard UL 1784 Air Leakage Tests of Door Assemblies, and meet the performance criteria for allowable air leakage as specified in NFPA 105-2013 Installation of Smoke Control Door Assemblies.

Fire Rated

Products indicated by this symbol are fire rated, classified and listed (U.S.A. and Canada) to meet the requirements/ standards of UL10B, UL10C, and UL10C (Edge Sealing). For a complete listing of fire rated and UL listed products, please refer to the UL Product Directory website, https://iq2.ulprospector.com.

PemkoHinge® Rating:

All hinge models designated with these symbols are tested by Underwriters Laboratories Inc.® (U.S.A. and Canada) to standards UL10B and UL10C for up to a 3-Hour Fire Listing for all 4'-0" x 10'-0" and 8'-0" x 10'-0" door and frame Us took Hinge assemblies. Fire listing certifications apply to all approved hollow metal and wood door assemblies in drywall or masonry wall construction. Check UL File #R14745 on the UL website for a complete and current listing of applicable PemkoHinge® products.

Builders Hardware Manufacturers Association: BHMA

Products indicated by this symbol have been voluntarily submitted to rigid third party testing and follow-up audits to confirm that they fully and continuously meet or exceed the requirements of their underlying ANSI / BHMA Standards. These products are listed in the BHMA Certified Products Directory. They are also posted and frequently updated on the BHMA website at www.buildershardware.com. Pemko products are covered by the following: ANSI / BHMA A156.21 Standard for Thresholds, ANSI / BHMA A156.22 Standard for Door Gasketing Systems, and ANSI / BHMA A156.26 Standard for Continuous Hinges.

UL1S47 - Check UL File #R18375 on the UL website for a complete and current listing of applicable Pemko edge sealing and fire glazing products (not specifically listed by item in this product catalog).

UL4L10 - Check UL File #R14369 on the UL website for a complete and current listing of applicable Pemko line products (not specifically listed by item in this product catalog).

BARRIER-FREE SYSTEMS

Æ

Pemko product lines include many products such as modular ramps, thresholds and floor treads, that help you meet the requirements of the Americans with Disabilities Act (ADA) as outlined in the Americans with Disabilities Act Accessibility Guidelines (ADAAG-2010 amended); ICC /ANSI A117.1 Standard Accessible and Usable Buildings and Facilities; any of the various Uniform Building Codes; or state access codes (e.g. California Building Code, Title 24).

The following table shows which products comply with the ADAAG and ICC /ANSI standard and also notes their respective sections.

ICC / ANSI A117.1 (ADAAG)	Pemko Recommendation
 302 (4.5) Floor or Ground Surfaces. 302.1 (4.5.1) General. "shall be slip resistant" <i>Skid resistant.</i> 	 "Slip resistant" PemKote", non-skid surface PemKote" (finish code: "K") is a rugged abrasive finish of nickel-aluminum composite PemKote" provides safety in environments used by youths and people with disabilities For more information, see the Modular Ramps section
302.2 (4.5.3) Carpet. "Exposed edges of carpetshall have trim along the entire length of the exposed edge. Trim shall comply with Section 303"	Note: See Commercial Thresholds section (page 136) for more options.
303 (4.5) Changes in Level	
303.2 (4.5.2) Vertical. "Changes in level of ¼" (6mm) high maximum shall permitted to be vertical"	Note: See Commercial Thresholds section (pages 134-135) for more options.
303.3 (4.5.2) Beveled. Changes in level greater than 1/4 inch (6.4 mm) in height and not more than 1/2 inch (13 mm) maximum in height shall be beveled with a slope not steeper than 1:2."	Note: See Commercial Thresholds section (pages 106-129) for more options
303.4 (4.5.2) Ramped. "Changes in level greater than ¼" (13mm) shall be by a ramp complying with Section 405 (4.8)"	 Assemblies accommodate ¹/₂" to 2¹/₄" floor offsets in meeting the 1:12 slope requirements of the "Americans with Disabilities Act" Rubber ramp component assemblies meet the same requirements. Answer the needs of architects, specifiers, building owners, installers, and physically challenged people For use in schools, hospitals, stadiums, offices, restaurants, hotels, airports, and more For complete information, see the Modular Ramps section
404 (4.13) Doors, Doorways and Gates. 404.2.4 (4.13.8) Thresholds. "shall be ¹ / ₂ " high maximumshall comply with Sections 302 and 303"	Note: See Commercial Thresholds section (pages 106-129) for more options.
404.2.8 Door and Gate Opening Force - 5 lbs. maximum	
405 (4.8) Ramps 405.2 (4.8.2) Slope. "Ramp runs shall have a running slope not steeper than 1:12" (Note: Some exceptions apply to this with respect to existing buildings having space limitations. Consult Pemko for specific applications.)	12 1 Note: See Modular Ramp section (pages 142-146) for more options.
504 (4.9) Stairways 504.4 Tread Surface 504.5 (4.9.3) Nosings	Note: See Floor Treads section (pages 132-133) and Floor Molding, Trim section (page 284) for more options.

325XGSSN Door Bottom Solution

AVAILABLE FINISHES: SS. SSBSP. SSWSP. SS10BE

REPLACEMENT INSERT: N25 (BL)

Stainless steel door sweep paired

with stainless steel angle

• #4 brushed stainless steel

• Supplied with K450XG end plate kit

EGA305XG_ Door Top Solution

AVAILABLE FINISHES: SS, SSBSP, SSWSP, SS10BE

Stainless steel construction, #4 brushed

- Stamless steel construction, #4 brushed
 Supplied with HSS2000 intumescent
- Supplied with K450XG end plate kit

EZgap™ (XG10 SERIES) Adhesive Gasketing

AVAILABLE FINISH: **BL (Black), BR (Brown), GR (Grey), W (White)** AVAILABLE LENGTHS: **18 ft, 50 ft Rolls**

(=

- Flexible, adhesive-applied solution for excessive gaps from 3/32" 1/4"
- \cdot Can be used as a full perimeter system or used independently on Latch Edge, Hinge Edge, or Header
- UL10C approved for 60 minutes for wood and hollow metal doors

XGSHIM Latch Shim Perimeter Solution

- Meets UL10C standards for
- 90-minute wood and metal doors
- For use on excessive gaps on the frame behind the strike plate
- Certified in USA & Canada
- Two product numbers,
- XGSHIM234 and XGSHIM478

Experience a safer and more open world

EXCESSIVE GAP PRODUCTS

XG2212_PK773 **Door Bottom Solution**

AVAILABLE FINISHES: A, BSP, WSP, 10BE REPLACEMENT INSERT: PK773 (BL)

- Aluminum construction
- · Easily field modifiable with standard equipment
- Supplied with K450XG end plate kit
- Patent Pending

XG90SSME-KIT Meeting Edge

- AVAILABLE FINISHES: **SS, 10BE, BSP, WSP** Certified for paired doors on both Hollow Metal and Wood Fire-Rated Doors, up to 90 minutes
- Meets UL10C requirements for excessive gaps up to 1/2" Furnished with metal edge guard and high performance
- intumescent: HSS2000BL, HSS90BL

XG90KIT **Perimeter Solution**

- Brings fire-rated doors with excessive vertical and head gaps back into spec - up to 3/8"
- UL Classified for 90-minutes
- Kit includes both products shown below, XG900 and HSS20XGxS773

XG900 **Perimeter Solution**

AVAILABLE FINISH: SP, SPBSP, SPWSP, SP10BE

- 16ga galvannealed steel
- · Can be screw applied or welded to metal frame.
- If welded, specify with "no holes" for clean appearance.
- · Can be field painted to match the frame

HSS20XGxS773 **Perimeter Solution** AVAILABLE FINISH: **BL**

- · Pressure sensitive adhesive backing
- Seals a gap at the header or along the jambs up to 5/16" for 60-min openings
- Seals a gap along the latch edge up to 3/8" for 90-min openings when used with the XG900SP in the XG90KIT

MARKAR CONTINUOUS PIN AND BARREL HINGES

Markar has been a leader in innovative products for the hardware industry since 1969. In 1983, Markar was the first manufacturer to produce an architectural grade, adjustable continuous pin and barrel hinge line, and that innovation continues today with quality continuous hinges and edge guards. Markar leads the industry in development of fire rated continuous hinges with their flagship 300 Series Stainless Steel, 3500 Series institutional grade, and 200 Series cold rolled steel hinges. Building on customer feedback, Markar has developed over 75 standard continuous hinge models providing products for a wide variety of applications and challenges.

Custom Designs

Whether the need is for a custom color to match a specific palette, hospital tips for patient rooms, hardware cutouts, wide throw models, custom hole patterns, security fasteners, current transfers, monitoring switches, or medical bearings, Markar hinge modifications will enhance the fit and function of an opening. Markar hinges are available in a wide range of finishes including powder coat, anodized (for aluminum), and architectural finishes.

Medical Bearings are Standard

Medical Bearings are standard for all Pin and Barrel hinges. You benefit from this standard offering with permanently lubricated hinges with no metal to metal contact, improving the life and overall function of the hinge.

Most door and frame stress is put on the top of conventional hinge systems.

A continuous hinge spreads the stress along the full length of the door and frame.

WHY CONTINUOUS HINGES?

Did you know that on a door with traditional butt hinges, 70% of the door weight is on the top hinge? The top hinge also bears the brunt of abuse when doors are opened beyond the stop device, resulting in kickback shock and eventual failure of the hinge and damage to the frame. This is why continuous hinges are recommended for heavy doors and for situations where doors are exposed to misuse.

Continuous hinges reduce the factors leading to hinge failure by distributing weight evenly so wear and tear to the frame and door is reduced significantly.

In addition, continuous hinges:

- Increase security and reduce vandalism by preventing insertion of devices between the door and frame
- Ease installation by providing simple alignment of electrical transfers and of monitoring switches
- Reduces air infiltration by creating a complete seal from top to bottom of the door at the hinge jamb

Markar manufactures pin and barrel hinges as well as spring loaded toilet partition pin and barrel models. There are over 75 different models to choose from offering a variety of configurations, options, and materials.

Markar Continuous Pin and Barrel Hinges

Optional Features

The Unique Adjust-A-Screw™ Fastener

An optional Markar fastener available on Hinge Guard models permits up to ³/₆" width adjustment. Full door length adjustment means doors can be squared accurately and easily in new installations and existing frames can be used in retrofits. Maintenance staff can make future adjustments of the door by re-positioning the Adjust-A-Screw™ Fasteners.

Adjust-A-Screw[™] Assembly

Recommended 14 gauge reinforcements on frame and door. If using an adjustable Hinge Guard with Adjust-A-Screw, use 14 gauge reinforcements on frame and 12 gauge reinforcements on door.

For more information, including technical memos, door clearance guides and templates visit www.assaabloydooraccessories.us

Exclusive Fiber-Reinforced Polymer Bearings

- Uniquely designed to provide clean and quiet hinge operation
- Self lubricating with high resistance to wear
- Exceeds ANSI/BHMA Grade 1 requirements
- 25 year warranty

Windstorm Rated Hinges

Windstorm/hurricane testing on Markar continuous hinges was completed with UL and has been reviewed and approved to meet the requirements of the Florida Building Code (FBC). These hinges have passed tests for the following: an Impact Test (TAS 201), Static Load/ Cyclical Test (TAS 202), and a Water and Leakage Test (TAS 203). Markar excelled in all three categories of testing.

c(VL)us

Based on this performance, the FBC approved most Markar hinges in the following series:

(Up to openings of 4'0 x 8'0 singles and 8'0 x 8'0 pairs)

- 100 6063-T6 Aluminum
- 200 14 ga. Cold Rolled Carbon Steel
- 300 14 ga. 304 Stainless Steel
- 600 14 ga. 316 Stainless Steel
- 3500 12 ga. 304 Stainless Steel (Security Grade)

Fire Rated Continuous Hinges

Markar Stainless Steel hinges (300 Series and 3500 Series) and carbon steel hinges (200 Series) are available with two labeling options: Underwriters Laboratories Inc. or Warnock Hersey International.

- · 20 minute labeled wood doors
- One and a half hour labeled hollow metal and composite-core wood fire doors
- Three hour labeled hollow metal doors

Maximum Door Opening: Single Doors: 4'0" x 10'0"

Pair of Doors: 8'0" x 10'0"

In accordance with UL10C for positive pressure.

Behavioral Health Hinges

STANDARD POWDER COAT FINISHES

Tough, Durable, Long-Lasting

Designed for general purpose interior and exterior use and applications where maximum chemical and solvent resistance is required.

Performance Properties

The data below is based on 24 gauge Bonderite 1000 panels with 1.5 mil to 2.0 mil of high gloss formulation.

Adhesion (ASTM D-3359B): There is no lifting of 1/8" squares of coating between scribed lines in crosshatch adhesion testing using pressure sensitive adhesive backed tape.

Pencil Hardness (ASTM D-3363): 2H - 4H

Flexibility (ASTM D-522 modified): The coating withstands a 180° bend over a $1/4^{\circ}$ diameter mandrel without cracking or loss of adhesion.

Impact Resistance (ASTM D 2794 modified): The coating withstands 160 inch-pound impacts, both direct and reverse, without cracking or loss of adhesion using the standard Gardner impact tester.

Abrasion Resistance (ASTM D-4060 modified): The weight loss of coating after 1,000 cycles on a Taber abraser equipped with CS-10 wheels and operating under a 1 kilogram loading per wheel is on the order of 35 to 50 milligrams.

Salt Spray Resistance (ASTM B-117): Bonderite 1000 steel panels, in a scribed condition, exhibit no undercutting after 1,000 hours in 5% salt spray testing at 95°F and 95% relative humidity. There was no rusting or blistering on the panel face away from the scribe.

Humidity Resistance (ASTM D-2247): Bonderite 1000 steel panels in an unscribed condition exhibit no effect after 1000 hours exposure to 100% relative humidity at 100°F.

Chemical and Solvent Resistance: After 60 days immersion in the test fluid, the following data was obtained for epoxy powder coatings:

15% Hydraulic Acid	No Effect
Lacquer Thinner	No Effect
Dilute "HTH" Pool Chemical	No Effect
15% Sulfuric Acid	Pinhole Rust
15% Caustic Soda	#8 Blisters
Ammonia Hydroxide	#8 Blisters
Petrochloroethylene	No Effect
15% Acetic Acid	#4 Blisters
Gasoline	No Effect

Verification of resistance properties should be made for each chemical or solvent proposed for use with the coating.

HINGE NUMBERING SYSTEM

Hinge Prefixes

- Edge Guard EG
- Edge Mount FM
- FS Full Surface
- НG Hinge/Guard
- HМ Half Mortise
- ΗS Half Surface
- SC Swing Clear

Hinge Series

This series number indicates the type of hinge and base material used:

- Aluminum barrel hinges with stainless pin 100
- 200 Carbon steel barrel hinges with stainless pin
- 300 Stainless steel barrel hinges with stainless pin
- 400 Spring loaded aluminum toilet partition hinge
- 14 Gauge 316 stainless steel pin and barrel 600 security hinges
- Spring loaded stainless steel toilet partition 900 hinges
- 1900 Reinforcing pivots
- 3500 12 Gauge stainless steel pin and barrel security hinges

Hinge Models

The last two digits of the model number indicate the application:

- 00 Edge mount (formerly full mortise)
- 01 Full surface, 1/8" offset
- 02 Full surface, flush
- Half surface, 1/8" offset 03
- 04 Half mortise, 1/8" offset
- Edge mount hinge/guard 05
- Half mortise hinge/guard 06
- 07 Double hinge/guard
- Edge guard 08
- Full surface, swing clear 09
- 10 Swing clear hinge/guard
- Edge mount, self aligning 11
- 15 Edge mount, self aligning flush edge guard
- 21 Full surface inset, 3/4" offset
- 22 Edge mount hinge/guard, deep
- 23 Edge mount hinge/guard, deep, thru bolt
- 25 Edge mount swing clear
- 26 Edge mount hinge/guard, swing clear
- 27 Edge mount, safety hinge
- 29 Edge mount, self aligning

Other numbers are used for specific applications

Optional Suffixes

- AMS Adjustable Monitoring Switch
- CTP **Current Transfer Preparation**
- DDP Dutch Door Prep
- ElectroLynx® Wires (Specify 4, 8, or 12) EL
- ETAP **Electrical Transfer Access Prep**
- EPT Electric Power Transfer
- ΗT Hospital Tip
- LL Lead Lined
- PC Powder Coated
- Raised Barrel RB
- WT Wide Throw
- Power over Ethernet PoE

Hinge Standard Lengths Standard Hinge Length Conversion Chart

A 6'8"	door opening	=	actual length	79 ³ /16"
A 7'0"	door opening	=	actual length	831/8"
A 7'2"	door opening	=	actual length	85 ¹ /8"
A 8'0"	door opening	=	actual length	95"
A 10'0"	door opening	=	actual length	118 ³ /4"

Custom hinge length will be evaluated at the time of request to ensure proper pin to knuckle alignment. Some custom length requests may be adjusted to ensure a proper hinge assembly. Specify handing on all custom hinge lengths.

CONTINUOUS HINGE MODIFICATIONS (Cont.)

EL ElectroLynx® Current Transfer

EL4 For 300, 3500, 200, and 100 series edge mount only. 2 wires at 22 gauge and 2 wires at 26 gauge - with ElectroLynx® connectors (4 wire) EL8 For 300, 3500, 200, and 100 series edge mount only. 2 wires at 22 gauge and 6 wires at 26 gauge - with ElectroLynx® connectors (8 wire) EL12 For 300, 3500, 200, and 100 series edge mount only. 2 wires at 22 gauge and 10 wires at 26 gauge - with ElectroLynx® connectors (12 wire) *We recommend an Electrical Transfer Access Prep (ETAP) with all ElectroLynx® modifications Replacement wire harness available (EL4-REPLKIT, EL8-REPLKIT & EL12-REPLKIT)

PoE (Power over Ethernet) ElectroLynx[®] Power and Data Transfer

PoE for most 3500, 600, 300, 200 and 100 series edge mount continuous hinges- with ElectroLynx[®] connectors (9 wire). Electrical Transfer Access Prep (ETAP) included.

ETAP Electrical Transfer Access Prep

Cutout prep for the AMS and EL modifications. This allows for easy, one-person access to wiring between the hinge and door

Security Fasteners

Specify Torx or Torx-Pin security fasterners in lieu of standard fasteners Contact factory for compatible models

CTP Current Transfer Prep

Centerline of hinge is standard location Hinge leaf cutout to accommodate Markar's EPT Electric Power Transfer or other manufacturers' power transfer units Please provide center line location (from top of hinge to centerline of prep) and handing for all prep locations - see CTP Form on Page 79 Order form required; available online.

EPT Electric Power Transfer Units

EL-EPTStamped steel, for up to 105° openingEL-EPTLStamped steel, long for 180° openingEL-EPT-SCStamped steel, for swing clear hingesEL-CEPTx32DCast Stainless Steel, satinEL-CEPTx10BCast Stainless Steel, oil rubbed bronze12-Wire with ElectroLynx® connectors standard on all power transfer unitsCTP prep is additional chargeNote: Ordering EPT unit does not constitute CTP prep on hingeOrder form required, available online.

AMS Adjustable Monitoring Switch

Rigid welded assembly gives you the ability to adjust your monitoring switch to work with all applications 300 and 3500 Series

Rating: 30v AC/DC .25 amps MAX

We recommend an Electrical Transfer Access Prep (ETAP) with this modification.

ElectroLynx®

As part of their promise to provide innovative, fast and effective high security solutions to their customers, certain ASSA ABLOY Group brands offer ElectroLynx[®], a universal quick-connect system that simplifies the electrification of the door opening.

MARKAR 3500 SERIES STAINLESS STEEL PIN & BARREL CONTINUOUS HINGES

Short Form Architectural Specification:

Continuous hinges shall be full height piano-type hinge providing full height door support.

- Supports weights up to 300 lbs. 4'0" maximum door width
- Material to be 12 gauge (.105) Stainless Steel
- .187" diameter Stainless Steel pin (rod)
- Each knuckle 2", including nylon bearing at each separation for a quiet, smooth, self-lubricating operation
- Finish: US32D Satin Stainless Steel (630)
 Optional Finish: US32 Bright Stainless Steel (629),
 Scratch-Resistant Powder Coated Paint.
- All hinges shall be furnished with manufacturer's recommended hardware pack per specific model application
- Must be able to carry UL label for fire rated doors and frames up to 3 hours
- Hinges shall meet ANSI/BHMA Standard A 156.26 Grade 1
- Symmetrically templated hole pattern

Note: 25-Year Warranty on Continuous Pin & Barrel Hinges Note: Fire label for doors and frames should be placed on the header and top rail of fire rated doors and frames

EL4 (4 wire), EL8 (8 wire), EL12 (12 wire) PoE (9 wire)

This edge-mounted pin & barrel hinge is used on many of today's high traffic, high abuse doors. The hinge works well in locations that would normally call out for anchor hinges, pivot reinforcement hinges or thrust pivot unit and hinge sets. This hinge saves on special door and frame preparation charges and makes the installer's job easier. It can be used on both fire labeled and non-labeled openings.

PoE (9 wire)

The integral hinge guard protects the door from dings and gouges from carts and gurneys while providing clean lines and aesthetic appearance. Our HG products also have fire ratings up to and including 3 hours. Not only that, but the wrap-around edge guard protects the door from unsightly dents and gouges and will deflect objects, preventing further damage.

Standard Sizes

6'8", 7'0", 7'2", 8'0"

Hole Pattern Symmetrically templated

Handing

Handing not required on standard hinges. Specify handing when ordering a hinge with modification

Windstorm

Evaluated in accordance with TAS 201-14, TAS 202-14, TAS 203-14, ASTM E330, ASTM E1886, ASTM E1996 and ANSI A250.13.

Electrical Modifications

Current Transfer Prep - suffix "CTP" Electrical Transfer Access Prep - suffix "ETAP" ElectroLynx[®] EL4 (4 wire), EL8 (8 wire), EL12 (12 wire) PoE (9 wire)

This door-edge mounted aluminum pin & barrel type hinge is extruded using 30% more aluminum than most geared hinges, giving it exceptional strength and durability. This product is specified in lieu of pivots or butt hinges due to its unique design which distributes the weight of the door down the entire length of the hinge.

MARKAR 900 SERIES SPRING LOADED PIN & BARREL TYPE CONTINUOUS STAINLESS STEEL HINGES

Short Form Architectural Specification:

Continuous hinges shall be full height piano-type hinge providing full height door support.

- Supports weights up to 80 lbs. 3'0" maximum door width
- · Material to be 14 gauge stainless steel
- Patented .25" diameter 303 stainless steel self closing pin assembly
- Exterior barrel diameter .438" (7/16")
- · Adjustable, tamper resistant Torx Head end caps
- Each knuckle 2", including split nylon bearing at each separation for a quiet, smooth, self-lubricating operation

- Finish: US32D Satin Stainless Steel (630) Optional Finish: US32 Bright Stainless Steel (629)
- Non-Handed
- All hinges shall be furnished with manufacturer's recommended hardware pack per specific model application
- Removable roll pin for spring loaded adjustment
- Symmetrically templated hole pattern

Note: 10-Year Warranty

MARKAR B1923 FULL SURFACE REINFORCING PIVOT

This full-surface reinforcing pivot adds years of life to openings where the hinges or hinge reinforcements have failed. An economical way to solve door sag problems, reinforcing pivots take the load off the top hinge and transfer it to screws that will not pull out.

Material:

Heavy Duty 3/16" (.187) Cold-Rolled Steel

Finish:

Zinc Plated (US2G)

Mounting:

8 ea. ¹/₄-20 x ³/₄" Phillips flat head machine screws 8 ea. #14 x 1¹/₄" Phillips flat head sheet metal screws 2 ea. ¹/₄-20 x 1³/₄" Sleeve bolts

Capacity:

Supports Weights up to 300 lbs.

Hole Pattern:

Symmetrically

Handing:

Non-handed

Matches 41/2" hinge barrel centerline

B1923 The B1923 pivot is designed with a ${}^{3}{}^{4}$ " offset to match the pivot point of a ${}^{4}{}^{1}{}^{2}$ " wide butt hinge.

CUTTING PIN & BARREL HINGES TO CUSTOM LENGTHS

- Step 1 The following instructions will apply to all Markar pin and barrel hinges except for toilet partition hinges. The general instructions apply for the 100, 200, 300 and 3500 series hinges. Follow option
 A for specific directions related to 100 series aluminum hinges and option
 B or C for specific directions related to 200, 300 series steel and stainless steel hinges.
- Step 2 Determine the amount the hinge needs to be shortened. Note the hand of the hinge before beginning to lay our your cut. All cuts should be done at the bottom of your hinge assembly so that the gang hole pattern is at the top.
- Step 3 Measure from the top of the hinge down and mark a cut line at the desired length.
 For 200, 300 & 3500 series hinges, follow the instructions below
 - If less than ³/₄" of knuckle is remaining follow option **B**
 - If ^{3/4}" or more of knuckle is remaining follow option **C**

- Step 4 Cut the hinge to length with a hacksaw or horizontal band saw, going through each hinge leaf, barrel and rod. If necessary, use a file to remove shart edges and deburr.
- Step 5 Slide the stainless steel rod out approximately 1" making sure the assembly stays together as one unit.
 - **A B** Remove ¹/₄" from the rod using hacksaw and then push back into it's original position.
 - **C** Remove ³/₄" from the rod using a hacksaw and then push back into it's original position.
- Step 6 Follow instructions below based on option used.
 - A Using a hammer and a center-punch, swage the aluminum material towards the center of the hole locking the hinge pin into place making sure it will not slide out.
 - **B** Using a pair of vice-grips, crimp the end of the steel barrel making sure the hinge pin will not slide out.
 - **C** Remove the end of the pin from the scrap hinge and insert it into the bottom of hinge using hammer.

What is PemkoHinge[®]?

PemkoHinge[®] consists of two full-height, paired and geared leaves. Each geared leaf rotates evenly from top to bottom riding on proprietary polymer blended bearings. The geared leaves and bearings are held together by a full-length channel cap. This assembly retains the smooth, clean lines of the door and frame, while easily supporting heavy vertical loads.

PemkoHinge®

SECURITY, SAFETY, PRIVACY, LOW WEAR AND TEAR

PemkoHinge[®] Attributes:

- With a continuous hinge, typical alignment problems (such as door sag and binding) are eliminated
- The continuous hinge distributes load stress uniformly along the full length of the door and frame
- The gear design of the continuous hinge ensures symmetrical operation of each leaf
- * $\ensuremath{^{1\!/_2}}$ lb. or less operating force required to operate most doors, regardless of size
- Low operating force feature makes continuous hinges ideal for doors used by the physically challenged
- The continuous hinge, when installed on standard steel doors and frames, requires no additional reinforcement. However, hinge preps must have fillers installed for proper operation
- A high degree of security can be achieved for exterior openings or restricted spaces by using a continuous hinge.
 With the geared construction and the full-length channel cap, the common gap between the door and frame is sealed, which provides security against prying
- In addition, the continuous full-height hinge cap protects against pinching fingers in doors in public areas, particularly those where children are present
- Sight proof design of the continuous hinge provides privacy for lavatories, executive offices, or file rooms

PemkoHinge® Superior Design:

- PemkoHinge[®] has increased critical stress points of the hinge leaf extrusions providing additional strengths and rigidity to the completed product
- PemkoHinge[®] bearing design eliminates premature wear, guarantees proper alignment, and requires fewer bearings to carry more weight. The bearing is produced for Pemko using a chemical composition and injection process that provides a stronger, more accurately formed bearing
- PemkoHinge[®] is designed with inter-meshing gear segments in the hinge which provide 50% more bearing surface resulting in less wear
- PemkoHinge[®] goes through the anodizing process after completing all machining. This means the machined aluminum surfaces that are in direct contact with the bearing have a smoother, harder surface, thereby reducing wear
- PemkoHinge[®] maintains uniform bearing spacing for the full length of the hinge even when lengths exceed 10'
- Pemko uses self drilling No.12-24 x 11/16" Flat Head Undercut, Type C, thread-forming fasteners, no tapping required
- PemkoHinge[®] commercial models are ideal for use on lead lined doors (i.e. hospital X-ray rooms), without requiring special screw locations

BHMA Certification Program

This program was developed to establish product classifications through performance testing. Three grades (1, 2 and 3) of product classifications were established for continuous hinges, with three weight groups (150, 300 and 600) for each grade: Grade 3 being the lowest and Grade 1 being the highest classification. Each classification and weight group has a set of established cycle requirements and wear characteristics, with a minimum for vertical and lateral wear to establish a listing under a weight and grade classification, after the set number of cycles is completed.

Maximum Vertical Wear Allowable:

Grade 3 = 0.105"

Grade 2 = 0.030" Grade 1 = 0.020"

Maximum Lateral Wear Allowable:

All Grades = 0.062"

Cycle requirements range from Grade 3-600 requiring 100,000 cycles through Grade 1-150 requiring 2.5 million cycles. For more information on certification testing or other product

certification programs, please contact Pemko Customer Service.

Cycle Requirements - Per BHMA Standard ANSI/BHMA A156.26-2012

- Standard Duty Hinges (excluding _RS175 & _RS138) conform to Grade 3-150 and Grade 3-300
- HD3 Hinges conform to Grade 3-150, Grade 3-300, and Grade 3-600
- HD1 Hinges conform to Grade 2-150, Grade 1-300, and Grade 1-600
- 1100 Series and X-Series Hinges conform to Grade 1-150

Weight Bearing - Per BHMA Standard ANSI/BHMA A156.26-2012

- This information pertains to all commercial models
- Heavier weight can be carried; please contact Customer Service for applications other than those listed in the chart
- Special hinge reinforcements are not required as hollow metal door and frame manufacturers' standard are acceptable. Removal of hinge reinforcements in the door and frame is not advised. Hinge preps must have fillers installed

- All models designated with these symbols are tested and certified by Underwriters Laboratories Inc.[®] (U.S.A. and Canada) to standards UL10B, UL10C and UBC7.2 (positive pressure) for a 1¹/₂-Hour Fire Listing for all 4'0" x 10'0" and 8'0" x 10'0" door and frame assemblies. Fire listing certifications apply to all approved hollow metal and wood door assemblies in drywall or masonry wall construction
- Special FirePins™ are only required on 3-Hour assemblies. Please refer to page 95 for illustrations and information regarding the application of Pemko FirePins™
- All hinges are supplied with standard fastener kits. Replacement kits/individual fasteners may be purchased separately
- Particle Board/TORX fasteners may be purchased separately. Full-mortise hinges require 40 each; half-surface hinges require 20 each; full-surface hinges require 12 each
- All half-surface and full-surface hinges are supplied with a snap cover for the door leaf. Replacement snap covers may be purchased separately

ELECTRICALLY MODIFIED CONTINUOUS GEARED HINGES

Electrical Modifications

Pemko has vastly improved the cycle performance of the electrically modified hinge. Performance testing has shown that 3,000,000+ cycles can now be achieved using Pemko's exclusive polyurethane-coated 4, 8, or 12 TRI-FLEX titanium copper alloy cables. Each cable is capable of carrying 6 amps continuous or 16 amps in-rush @ 24-volts for 820 milliseconds. When ordering, please use the "shorthand code" shown in the chart page 82. For example, if you require a Clear Anodized standard Full-Mortise hinge at 83" with Quick Connect transfer - 4-wire, modified 361/4" from the top, right hand, you would order a CFM83 with QC4 at 361/4" from top - RH

Options for Electrically Modified Continuous Geared Hinges

These options allow variable degrees of service to be performed at the specific locations of the current carrying cables by installing a serviceable/removable hinge which includes a removable module (SER), or installing a hinge with a pivoting accessible feature (ACC).

- Both options (SER & ACC) are available in 4 Wire (QC4), 8 Wire (QC8), 12 Wire (QC12) variants
- Available on FM, FS, HS, KFM, SLF, SLI, XF, XI, XK, XM, X25M Models

Serviceable/Removable (SER) Module

The hinge is furnished to be installed in three sections allowing the current carrying cable to be serviced or replaced without removing the door from the frame. Additionally, the SER option allows the current carrying cables to be safely stored or delivered to the electrician or security contractor prior to the installation of the electrified hardware, eliminating the necessity of the electrician or security contractor being present when the doors are being hung.

Product Numbering Example: CFM83HD1xSER4

Accessible (ACC) Feature

The hinge is furnished to be installed in a single section with the leaves modified to pivot at the location of the current carrying cable and allow access to the cables and connected wiring.

Product Numbering Example: CFM83HD1xACC4

Concealed Magnetic Monitoring (CM)

Concealed magnetic monitoring is also available with the SER and ACC options. Magnetic monitor is supplied with monitor and an adjustable magnet.

Product Numbering Example: CFM83HD1xSER4xCM CFM83HD1xACC4xCM

POWER TRANSFERS

• These Securitron electronic power transfer units fit into doors and frames to transfer power from your power supply to the door-mounted electronic device

EL-CEPT

AVAILABLE COLORS: US32D, US10B

- · Mortises into the edges of the door and frame
- · Tamper-resistant; no exposed openings
- All metal construction, including backboxes
- * $\ensuremath{\mathcal{V}_8}\xspace$ knockouts on back boxes to accommodate EMF-type fitting
- 12-wire configuration with ElectroLynx compatible connectors
- Tested to 1,000,000 cycles
- · Will not work on center-hung or balanced doors
- Works with most continuous hinges, up to 6" wide
- UL10B and UL10C listed

EL-EPT

AVAILABLE COLORS:

- Installs in the door and frame edges
- Flexible steel shield protects wires-3/8" (9.5mm) I.D.
- New universal device; works with most butt and continuous hinges
- \cdot Not for use with center pivot doors or with pivot hinges with offset greater than $_{4}^{\prime\prime}$
- UL634, UL10B, UL10C Listed
- ANSI A250.13-2003–Windstorm Resistant

EL-EPT-SC

AVAILABLE COLORS: US2C

- Installs in the door and frame edges
- Flexible steel shield protects wires- 3/8" (9.5mm) I.D.
- New universal device; works with most butt and continuous hinges
- · Functions on off-set pivot and swing clear hinged doors
- UL634, UL10B, UL10C Listed
- ANSI A250.13-2003–Windstorm Resistant

- Contact your hinge manufacturer for cutout availability
- · Order form required, available online

EL-EPTL

AVAILABLE COLORS:

- Installs in the door and frame edges
- Flexible steel shield protects wires-3/8" (9.5mm) I.D.
- New universal device; works with most butt and continuous hinges
- \cdot Not for use with center pivot doors or with pivot hinges with offset greater than ${}^{\scriptscriptstyle 3\!/}_4{}^{\scriptscriptstyle \prime\prime}$
- UL634, UL10B, UL10C Listed

ACOUSTIC THRESHOLDS

- Pemko's line of Acoustic Thresholds are designed to aid with a door's STC rating
- **2006STC** is only ADA compliant when installed butted to other flooring materials in accordance with ADA guidelines
- Thresholds will not improve a door 's "sealed in-place"
 STC rating
- See the Acoustic Catalog Section or visit Pemko's website, www.pemko.com, for more Acoustic products and additional information

THRESHOLD WITH FLEXIBLE JOINT

- Flexible joint allows the threshold to flex as much as 20° up or down
- Expands up to an additional 1/4"

NOTE: Products shown in this section may not be drawn to scale.

ECO-V[™] THRESHOLDS

- Eco-V[™] thresholds create an ideal transition where two different pieces of carpet meet, or carpet meets another surface under a door
- Ideal for use in any high-traffic commercial installation, such as hotels and offices
- Eco-V[™] thresholds are manufactured from slightly softer material than competitive products. This aids in the cutting and fitting of the threshold and facilitates easier insertion of the carpet into the holding cavities on the carpet side(s) of the threshold
- Eco-V[™] thresholds are designed to work in conjunction with Pemko's 2173 V, 2113 V and 2343 V door shoes
- EV232, EV2325, and ADJ232V thresholds meet the requirements outlined in ADAAG-2010 (Amended); ICC/ANSI A117.1 and California Building Code, Title 24 for Barrier-Free Entry - ½" max rise above finished floor

EV232 AVAILABLE COLORS: BL, D

EV2325

AVAILABLE COLORS: **BL. D** AVAILABLE LENGTHS: 36", 48", 73" Serves as a transition where one piece of carpet meets tile beneath an interior door

EV2326

AVAILABLE COLORS: **BL, D** AVAILABLE LENGTHS: 36", 48", 73" Serves as a transition where two pieces of tile meet beneath an interior door

EV2320

AVAILABLE COLOR: BL AVAILABLE LENGTHS: 36", 48", 73" Serves as a transition where carpet meets concrete beneath an interior or exterior door

EV2322

108

AVAILABLE COLOR: BL AVAILABLE LENGTHS: 36", 48", 73" Serves as a transition where carpet meets 1/8" tile beneath an interior door

ADJUSTABLE-WIDTH ECO-V[™] THRESHOLD

- The adjustable-width threshold is designed for installations where the widths of the transition beneath a door may need to change, without completely disassembling and reinstalling the threshold
- The adjustable-width threshold consists of two Eco-V[™] end pieces and one Eco-V[™] adjustable center section
- Center section (**EV2321** below) can easily be cut to size with a standard razor knife

ADJ232V8_

AVAILABLE COLOR: **BL, D** AVAILABLE LENGTHS: **36", 48"**

ADJ232V14_

AVAILABLE COLOR: **BL, D** AVAILABLE LENGTHS: **36", 48"**

2'

- Eco-V[™] threshold ends can be used in many combinations to suit your flooring combination needs
- Shown below is EV232 used with EV2325 to illustrate use with carpet outside one communicating door and tile outside the other

ADJ232x2325V8_

AVAILABLE COLOR: **BL, D** AVAILABLE LENGTHS: **36", 48", 73"** Serves as a transition where carpet meets tile

FLOOR PLATES/SAFETY TREADS (Cont.)

ALUMINUM PLATES

- Used where a cover plate, expansion joint plate, or wide extra-strength metal plate is needed
- Maximum length is 144". All aluminum plates are provided NET length
- Both length edges are beveled at a 45° angle; "single edge bevel" or "no bevel" is also available at no extra cost; length of plate should be roughly equal to width of opening.
- Plates are supplied undrilled unless otherwise specified. Pemko reserves the right to charge for special fastener patterns
- Plates are furnished with #10 x 1¹/₂" wood screws. Screws supplied: one (1) screw per foot up to 8" wide; two (2) screws per foot 8" to 12" wide; and three (3) screws per foot over 12" wide
- Plates are ADA compliant only when ordered with PemKote finish

ASSA ABLOY

FLOOR CLOSER THRESHOLDS/COVER PLATE ASSEMBLIES

- TYPE OF ASSEMBLY Type 11 or 14 for center hung, Type 13 SPECIAL FINISHES Examples include polished, oxidized or 15 for offset hung
- MATERIALS Saddles, floor plates, supports, risers, elevators, and stop strips
- CLOSER TO BE USED Manufacturer and model number
- NET LENGTH Jamb-to-Jamb. Assembly Types 11, 13 and 14 are cut with center section $\frac{1}{2}$ over net length up to 48" and 1" over net length over 48" to allow for fitting on the job. Please specify "net length", if required. Assembly Type 15 is cut at net length because of factory-cut miters
- HANDING For single doors, specify right or left hand. For pairs of doors, handing is not required

- and oil rubbed, and PemKote™
- SPECIAL FASTENERS For center section only. Examples include: MSES, FHSL25, and MSES-SS
- SPECIAL FABRICATION INSTRUCTIONS Notching, full miters, etc. Assembly Type 11 is supplied without mitered ends, and assembly Types 13, 14 and 15 are supplied with both ends mitered. Also, when ordering stop strips (shown on page 132), specify door thickness and pivot offset so that the threshold assembly width and pivot dimension can be determined
- RETURNS AND ALLOWANCES Restock fee for "custom" material applies to these products

RAMP ORDERING INFORMATION

Flush Applications

Example:	R 1 F M	R AK		
Product	Floor Offset Height	Application	Option	Finish
R = Ramp	.5 = ½"	F = Flushes out to floor offset	MR = Miter Return (1 pair)	A = Aluminum (mill finish) AK = PemKote™ (skid-resistant surface)
	.75 = ¾"			
	1 = 1"			
	1.25 = 1-1⁄4"			
	1.5 = 1-1/2"			
	1.75 = 1-¾"			
	2 = 2"			
	2.25 = 2-1⁄4"			

Offset Applications - 7" Top Plate

Example: F	R 1 OS MF	R AK		
Product	Floor Offset Height	Application	Option	Finish
R = Ramp	.5 = ½"	OS = Up & over offset w/ 7" top plate	MR = Miter Return (1 pair)	A = Aluminum (mill finish) AK = PemKote™ (skid-resistant surface)
	.75 = ¾"			
	1 = 1"			
	1.25 = 1-¼"			
	1.5 = 1-1⁄2"			
	1.75 = 1-¾"			
	2 = 2"			

Offset Applications - 3½" Top Plate

Example: R 2 OSS MR AK

Product	Floor Offset Height	Application	Option	Finish
R = Ramp	.5 = ½"	OSS = Up & over offset w/ 3-½" top plate	MR = Miter Return (1 pair)	A = Aluminum (mill finish) AK = PemKote™ (skid-resistant surface)
	.75 = ¾"			
	1 = 1"			
	1.25 = 1-1⁄4"			
	1.5 = 1-1/2"			
	1.75 = 1-¾"			
	2 = 2"

MODULAR RAMP THRESHOLD ASSEMBLIES

- Assemblies accommodate 1/2" to 21/4" floor offsets in meeting the 1:12 slope requirements of the "Americans with Disabilities Act". Even higher offsets can be accommodated by using the risers, RAMP13_ and RAMP14_
- "MR" in a product number denotes that one-pair of miter returns (and extenders, if applicable) is included. Otherwise, we recommend filling and feathering the threshold ends with grout. Do not leave threshold ends open
- Miter Returns are available for offsets up to $2^{1/4}$ "

MODULAR RAMP THRESHOLD COMPONENTS

- · Components are generally sold as part of assemblies
- Ramp Assemblies consist of interlocking components, eliminating the need to weld joints. Interlocking ball-joint design allows each component to flex and conform to uneven surfaces
- All assemblies carry the following labels:

 PemKote[™] is highly recommended for all threshold assemblies, especially exterior conditions where moisture may be present

NOTE: The following pages are for component identification only. Do not order from these pages. Order only complete assemblies from pages 140 to 142

TOP PLATES

MODULAR RAMP THRESHOLD ASSEMBLIES - VARIABLES

- Use a "Variable" component to accommodate offsets from ¹/₂" to 1¹/₄". These meet the 1:8 maximum slope allowance (ADA) for existing buildings. For new construction, this assembly is only ADA compliant in certain applications as outlined by the current ADA standard
- May require a variance from some state building codes, even though ADA compliant
- Ideal for use in cross traffic corridors where a minimal ramp projection may be required and a steeper slope may be allowed. Supplied with #10 stainless steel sheet metal screws. Stainless steel machine screws and expansion shields are available at an extra cost
- · Miter returns are not available due to the variable angle of this ramp. Please fill and feather the threshold ends. Do not leave threshold ends open
- This variable ramp is supplied un-drilled from Pemko. Due to the variance in the angle, it must be drilled in the field. For proper installation, it requires the **RAMP7** to be placed under **RAMP2** after the assembly is in place, then must be match drilled and anchored through both components
- PemKote[™] is highly recommended for all ramp threshold assemblies especially exterior conditions where moisture may be present
- · In addition to ADA compliance, outlined previously, all assemblies carry the following labels:

RVARIOSS

VARIABLE RAMP COMPONENTS

RISERS FOR MODULAR RAMPS

- · Risers easily attach to the legs of Pemko's Modular Ramp Systems. Each adds 1/2" in height to accommodate offsets greater than 21/4"
- · Contact Pemko Customer Service for information on stacking risers to reach desired height

ASSA ABLOY

MITER RETURNS FOR ALL MODULAR RAMP THRESHOLDS

- Cast aluminum "wings" fit into end of modular ramp threshold assembly and are fastened to ramp mid sections with self-tapping machine screws
- Neat, compact, and tight-fitting design replaces former mitering methods
- · Miter Returns are match-drilled with each assembly
- · Miter Returns are not "ADA" compliant
- Miter Returns are handed from the low end and are determined by which side of the ramp it fits into BHMA

WING10_H_

AVAILABLE FINISHES: A, AK

• WING10 can be trimmed to fit ramp assembly (dotted lines show cut down for use with R.5FMR_)

WING10RH_

(right-hand shown)

FIRE RETARDANT AND STYRENE BUTADIENE RUBBER RAMP THRESHOLDS

SBR1F

- Rubber ramps meet the requirements of ADAAG-2010; IBC/ANSI A117.1; and California Title 24, Part 2
- Styrene butadiene rubber ramps are weather, ozone, abrasion, and impact resistant; long-lasting and fire retardant
- Rubber ramps are sold in one foot increments up to 15-foot lengths
- Rubber ramps can be butted together for longer lengths
- Rubber ramps are cut square on each end but are available with molded rubber miter returns. To receive a pair of miter returns, add "MR" to the part number (example: SBR.5FMR)
- Rubber ramps have a superior grip, anti-slip surface and a "no bump" tapered lead edge. Rubber ramps are classified by Underwriters Laboratories, Inc.,[®] as a skid-resistant floor surface per UL standard for safety, UL410. Rubber ramps also meet the requirements of ASTM D 2047 and Federal Specification P-F-430C

- Rubber ramps are easy to install on most surfaces by using a construction adhesive. Mechanical fasteners are not required and not recommended
- Rubber ramps are also portable. For temporary applications, an assembly stays in place by its sheer weight and can be removed from one opening and placed at another opening
- Use an adhesive (caulk) suitable for use with plastics and your flooring material for proper installation and adhesion
- + Rubber ramps are available for $^{1\!/}{}_2"$ and 1" offset heights
- Rubber ramps can be cross-cut to length or ripped to a custom offset height using a table or radial arm saw with a carbide-tipped blade. These modifications must be made in the field

This component (RR2) is not ADA compliant when used by itself.

NOTE: Products shown in this section are not drawn to scale.

** = Miter Returns are not ADA compliant

Experience a safer and more open world 800-824-3018 | www.pemko.com Check the web site for the up-to-date catalog

RECYCLED RUBBER RAMP ASSEMBLY

- ADA Compliant, based on application
- Meets: UL410, ASTM D2047, Federal Specification P-F-430C
- Recycled Rubber Ramp Assemblies meet IBC/ANSI A117.1-2013
- Made from #20 mesh minus crumb rubber (with urethane binders) reclaimed from 100% recycled rubber automotive tires
- Use an adhesive (caulk) suitable for use with plastics and your flooring material for proper installation and adhesion. Avoid Liquid Nails with Rubber Ramps

- Using ordinary tools, trim to fit your application
- + Can be ripped for offsets less than $1^{1\!/_4}$
- Plane bottom surface of ramp to accommodate irregular surface conditions
- Miter returns are molded into the design of the Recycled Rubber Ramp
- 36" and 60" ramps are supplied as one (1) piece assemblies
- 48" and 72" ramps are supplied as two (2) piece assemblies
- Dimensions are nominal and can vary by as much as one inch. This is acceptable as long as the two halves match

AUTOMATIC DOOR BOTTOMS

- All Pemko Automatic Door Bottoms, 24" and up, can be manufactured for field alteration. Please specify when ordering: Allow 2" for field trimming
- Overall sizes range from 12" to 72". Sizes between 12" and 23.9" will be supplied at absolute NET length and will have no room for field trimming.
- 0.0625" Lead-lining available upon request; contact Pemko Customer Service for options on profiles
- Provided with end plate kits (except 420, SA, and 405V models) which include wood screws. Tek screws are available for mounting to hollow metal doors.
- See Planet Automatic Door Bottoms for additional models made by ASSA ABLOY Schweisse and offered in the U.S.A. by Pemko.

IMPORTANT DROP BAR INFORMATION

Drop seals of all types are designed to close a uniform size gap. Pemko drop seals can seal up to ¾" gaps (420 model can seal up to ½" gap), provided the gap is consistent. Gaps that start at less than ¾" and then grow cannot be closed. The drop seal utilizes a straight aluminum extrusion so it cannot close an inconsistent gap.Plunger extension to drop dimension is 1:1 (i.e., a ¼" extension on the plunger will equal a ¼" drop of the drop bar).

DROP-BAR SEAL ACTUATION

The drop bar mechanism prevents the seal from skidding along the floor/threshold while the door is being closed.

800-824-3018 | www.pemko.com Check the web site for the up-to-date catalog

AUTOMATIC DOOR BOTTOMS - ACOUSTIC

- Non-handed
- Recommended gap under door is ³/₈" for optimal acoustic performance; max drop is ³/₄"
- Internal mechanism allows bar to accommodate slight imperfections in floor materials
- STC411 end plate kit is K435; for doors narrower than 1-3/4", specify end plate kit K411
- STC4131 end plate kit is K4133C for Clear Anodized and K4133D for Dark Bronze Anodized

NOTE: STC411_PK Automatic Door Bottom is now included in PEMKOSTCSET-1 (A through E). Please see Acoustic Products section for more information.

NOTE: Products shown in this section may not be drawn to scale.

ASTRAGAL AND MEETING STILE GASKETING -SPLIT ASTRAGALS

- · Astragals and meeting stiles with a fire label may be mounted on pairs of doors wherein the gap meets the requirements of NFPA 80, 6.3.1.7.1 "The clearance between... the meeting edges of doors swinging in pairs on the pull side shall be $1/8" \pm 1/16"$ (3.18mm ± 1.59mm) for steel doors and shall not exceed ^{1/8}" (3.18mm) for wood doors"
- · Punched with slotted holes for adjustment

- Order split astragals at two (2) pieces by door height per set of double doors. When ordering add "/2" to the end of the part number to specify 2 pieces (i.e. order quantity 1 each 303AS84/2 to get two lengths at 84 inches)
- · Clear anodized brush products are supplied with gray brush. Painted white brush products are supplied with white brush when available, otherwise black brush is supplied. All other finishes supplied with black brush. Black brush is available for clear anodized and painted white brush products upon request.

ADHESIVE ASTRAGAL/MEETING STILE SEALS

- The **S771** and **S772** astragal/meeting stile seals can be installed on virtually any pair of doors where sound attenuation is required. These products seal the opening to prevent heat loss, retard the passage of smoke, and act as a weatherization product
- Excellent resistance to compression set, particularly at elevated temperatures and for extended periods of time
- S771 AVAILABLE FINISHES: **BL**, **C**, **D**, **W** AVAILABLE LENGTHS: **7'**, **8'**, **9'**, **10'** ANSI: **R0E754**, **R0E755** $\frac{9}{32}^{"}$ (7.1)Adhesive Backing

Notes For All Adhesive Gasketing:

Storage and shelf life: All adhesive gaskets have a limited shelf life. This product must be installed within 6 months of purchase and must be stored between 50°F and 100°F. For further notes/details, please see Adhesive Gasketing section.

ADJUSTABLE ASTRAGALS

- Available in 84", 96" and 120" lengths
- When used as split astragals on double doors, two lengths must be ordered: one for each door
- If you require split astragals in a metal to gasket configuration, you must order using part number 351_/351_PK where "PK" can be any gasket designation shown in this section and "_" is your desired finish

351_PK

AVAILABLE FINISHES: 10BE, B, BSP, C, D, G, WSP REPLACEMENT INSERT: PK4 (BL, GR)

- Suface applied
- For use with square-edge or bevel-edge doors
- 351_PK (et al) is one single piece; order 351_/351_PK to receive both pieces as in drawing

354_PK available finishes: 10BE, B, BSP, C, D, G, WSP replacement insert: PK4 (BL, GR)

- Fully mortised
- Designed for use with bullnose doors
- 354_PK (et al) is one single piece; order 354_/354_PK to receive both pieces as in drawing

354_ / 354_PK shown below

• Stays flexible between -58°F and 450°F with very high resistance to flex fatigue

- · Maintains a low closing force
- Easy installation requires no mechanical fasteners; can be cut to size in the field

S771x6 AVAILABLE FINISHES: BL AVAILABLE LENGTHS: 7', 8', 9', 10' ANSI: R0E154, R0E155, R0E754, R0E755

- Designed for hollow metal and wood meeting stile applications
- Seal begins compressing at ^{5/}16"

LOCKING ASTRAGALS

- \cdot Weatherstripped astragals with locking spring bolts or slide bolts for $1_{3/_4^{\prime\prime\prime}}$ inswing double doors
- Odd numbered astragals have economical smooth acting slide bolts. Slide bolts are 4" from the top/bottom standard; optional 18" slide bolt is available for easier access. Even numbered astragals have locking spring bolts. Both have full $_{9_8}$ " diameter steel bolts with $1_{7_{16}}$ " throw. In the extended and locked position, locking spring bolts cannot be easily retracted by tampering. In the retracted position, the spring loaded bolts latch firmly, preventing marking of the floor and door header trim when opening or closing the inactive door
- Styles **3493** thru **3498** come with a molded sponge neoprene bottom seal

Handing Chart For Astragals (For pages 169 thru 171)

• An astragal is handed by the hand of the active door. The hand of the active door is determined by the position of the hinges on the door, when viewed from the outside (the key side)

Slimline style with slide bolt 3493 V

REPLACEMENT INSERT: EV41 (BL, W) AVAILABLE FINISHES: C, G, D, BSP, WSP

 3493 also available with 18" slide bolt (at additional cost) for easier access (specify "L" at the end of the product number for this option i.e. 3493_VL)

Slimline Style

- All feature four-way adjustable strike plate mounting for latchbolt and deadbolt
- All come with a Eco-V[™] snap-in cover strip to conceal the cutout and cover the mounting screws
- Astragal stock lengths are 80", 84", 96" and 120"
- A standard deadbolt punchout is ${}^{3}/_{4}$ " x 4" at 40" on center Punchout supplied on request only
- For non-stock astragals, specify deadbolt punchout size and center distance from top end
- Specify handing using the handing chart on page 181 or 184

180° ALUMINUM RETAINERS

- · All brush seals consist of densely compressed nylon filaments encased in a high quality aluminum retainer. These products are ideally suited for hollow metal and wood door applications. Also use Pemko's brush weatherstripping product on overhead, section, sliding, and automatic doors
- All brush seals reduce the infiltration of light, air, wind, rain, and snow; prevent heat loss; and control the penetration of smoke and fumes
- Brush remains flexible down to -40°F and has a melting point above 400°F
- · UV stable, dependable, long-lasting, cost-effective
- Punched with slotted holes for adjustment (except 35° angle types which are drilled with 1/8" hole)
- · Naturally repels rodents and spiders; can be sprayed with household pest repellent for additional pest control

STANDARD PERIMETER GASKETING

- Rigid jamb weatherstrip shown mounted on openings with $1/_{16}$ " gaps; however, each weatherstrip can seal gaps up to the depth of its seal. Seal depth provided on each illustration (example: the 303 has a $1/_4$ " seal; therefore, it can seal up to a $1/_4$ " gap)
- Punched on 6" centers with slotted holes for adjustment. Models 294, 303, and 306 are available with self-adhesive two-sided tape (TST) and tek screws (3 slotted holes per part) for easy installation. To obtain this option, add "TST" to the end of the part when ordering (example: 303AVTST)

SILICONSEAL ADHESIVE-BACKED FIRE/SMOKE GASKETING

- SiliconSeal is extruded from high-temperature silicone; effective between -58°F and 450°F
- Self-extinguishing and non-toxic; unaffected by sunlight, ozone, and ultraviolet rays
- Impervious to fungus and mildew; will not deteriorate under normal exposure
- Meets FAR 25.853 Airworthiness Standards for Compartment Interiors

Application is acceptable anywhere along jamb face **S44 shown, but application detail applies to PK33, PK55, S442, S77, S88, S773, and S776 also.

ECO-V[™] THRESHOLDS

- Eco-V[™] thresholds create an ideal transition where two different pieces of carpet meet, or carpet meets another surface under a door
- Ideal for use in any high-traffic commercial installation, such as hotels and offices
- Eco-V[™] thresholds are manufactured from slightly softer material than competitive products. This aids in the cutting and fitting of the threshold and facilitates easier insertion of the carpet into the holding cavities on the carpet side(s) of

the threshold

- Eco-V[™] thresholds are designed to work in conjunction with Pemko's 2173 V, 2113 V and 2343 V door shoes
- EV232, EV2325, and ADJ232V thresholds meet the criteria outlined in ADAAG-2010 (Amended); ICC/ANSI A117.1 and California Building Code, Title 24 for Barrier-Free Entry - 1/2" max rise above finished floor

EV2325

AVAILABLE COLORS: **BL**, **D** AVAILABLE LENGTHS: 36", 48", 73"

Serves as a transition where one piece of carpet meets tile beneath an interior door

SHS80 SERIES

For Sliding Panels up to 200 lbs.

Overhead Mount

Side Wall Mount

Configurations:

- Single
- Bi-parting

Overhead Mount

• Side Wall Mount

Installations:

Features:

- Hanger body is made of nickel plated zinc alloy for durability and long life
- Steel ball bearing wheels coated in nylon for smooth operation
- 200 lb. panel capacity
- Optional Soft Close
- 5 year warranty
- Meets ADA push force requirements

SHS80 Kits Include:

- 1 ea **280C** Clear Anodized Aluminum Track
- 2 ea H222R1 Nickel Plated Zinc Alloy Body
- 2 ea **601H** Nylon In-Track Clip Stop
- 1 ea **102WN** White Nylon Mortise Guide on Zinc Plated Steel "L" Metal

Standard Kit Sizes							
PART NUMBER	MATERIAL	TRACK LENGTH	DOOR WIDTH				
SHS80/6	Aluminum	72"	36"				
SHS80/8	Aluminum	96"	48"				

Options:

Fascia	F134C clear anodized aluminum fascia
Side Wall Track Brackets	F134D dark bronze anodized facia PC2815 available as 5 pack only, PC2815 pack of 5 281 zinc plated side wall bracket. NOTE: Need one at each end and no more than 2 feet in-between. Fasteners included.
Track	280D dark bronze anodized track
End Plate Kit	K134EP (use with F134C and 280C only)
Bottom Channel	94A
Roller Guide	106R/94
Threshold	971A
Side Wall Mount	
Extra Hardware Pack	SHS80/PACK
Mortise Floor Guide	102N
Delense less Colle Del	FRRAR (ALCONTACTOR (ALCONTACTOR)

Polypropylene Guide Rail **EPD3BL** for use with 102N or 102WN Soft Close available. See page 256-258 for more information.

The Impact of Sound

Everyday our ears are met with a barrage of sounds. Sounds can be pleasant, like music or laughter. But they can also be disruptive, like construction or traffic, or even just the people in the cubicle next door. At a certain point sound becomes noise and we look for ways to control it. Sound control is especially important in classrooms, hospitals, hotels and offices, as it impacts our ability to learn, heal, sleep and think. The U.S. Green Building Council recognizes the importance of acoustical control by including LEED Indoor Environment Quality (IEQ) credits for acoustics.

Description of Sound

Sound can be described as vibrations in the air moving in waves. The rate of sound vibrations measured in cycles per second is called frequency and is measured in hertz (Hz). Sound pressure levels are measured in decibels (dB). For a list of common noises and their related decibel level, see the chart on the right.

ound Level dB

0	Threshold of hearing	Inaudible
20	Very rural environment	Extremely quiet
30	Quiet home	Faint
40	Quiet office	Distant sounds audible
50	Background conversation	Moderate
60	Radio/Television in home	Moderate
70	Highway noise	Moderately loud
80	Background factory noise	Loud
90	Noisy factory	Very loud
105	Elevated train	Deafening
120	Bass drum at 3'	Physical pain
130	Jet aircraft at 100'	Physical pain

Basic Acoustics

Sound transmission reduction relies on two main principles:

Sound Absorption - Removing sound energy from within a room by using materials such as acoustic tiles or open cell foam to soak up sound.

Sound Insulation - Preventing the transmission of sound waves by introducing a barrier. Examples include brick, concrete, metal, heavy doors, etc.

Sound waves will travel the path of least resistance. A high performing door will not compensate for less performing materials in the walls around it.

In order to reduce the transmission of sound, materials are added between the source room and the receiving room. The resulting change in decibel level is the sound transmission loss and is given a Sound Transmission Class (STC) rating. The higher the rating number, the lower the transmission of sound. The STC rating is roughly the decibel reduction a partition can provide. For instance, if a 100 dB noise is reduced to 55 dB, that product roughly has a STC 45 rating.

200

Sound Flanking

Flanking is the leakage of airborne sound around a door opening through any available gap. Flanking between the door leaf and the surrounding frame is reduced by the use of seals.

Optimum sound attenuation performance is likely achieved using a four sided frame with a sill made to the same detail as the head and the seals set in a single plane. If a full four sided frame is not an option, then alternative threshold sealing options should be made such as automatic door bottoms, door shoes and/or thresholds.

Active STC Rating	Level Of Speech Heard
STC-30	Loud speech understood
STC-35	Loud speech heard but not understood
STC-40	Loud speech audible as a murmur
STC-45	Some loud speech barely audible
STC-48	Hearing strained to hear loud speech
STC-50	Loud speech not audible

STC Ratings

Acoustic Door Testing is done on "sealed-in-place" (fully caulked) doors for door STC ratings, as well as on assemblies (with gasketing and door bottoms) for operable STC ratings. Operable STC ratings are always equal to or lower than the sealed-in-place ratings. The best performance rating on the operable test is a 'zero drop' in the assembly's STC rating. For example, a door with a STC 45 rating can only achieve an operable STC of 45 at its very best; it can never achieve a STC 50.

Also, since sound waves travel the path of least resistance, a high performing door will not compensate for elements like improperly installed seals around doors, the lack of a threshold under the door, a non-insulated frame, louvered doors, or poor seals at the wall/ceiling/ floor/mullion connections.

When STC ratings are determined, normal human speech and hearing are used. In most cases the level of reduction does not totally eliminate but rather muffles the sound to an unintelligible level. The chart shown on the left compares the level of speech that would be heard through a door system with the indicated operable STC rating.

Look for Pemko products with this symbol:

Tested To: ASTM E 90-2009

Products indicated by this symbol have been acoustically tested in accordance with ASTM E90 -Standard Test Method for Laboratory Measurement of Airborne Sound Transmission Loss of Building Partitions and Elements.

Need STC Rated Doors?

Pemko Acoustic Seal Sets are an important part of an overall acoustic solution. ASSA ABLOY Group brands can provide the other elements of the solution including STC Rated Doors, STC Rated Frames and complete STC Rated Assemblies.

Acoustic Seal Sets

Pemko acoustic components are available in their appropriate sets. These product combinations are lab tested and have known decibel drops when used with sound-rated doors. Each kit includes gasketing, a door bottom or threshold, and a complete set of installation instructions. Installation instructions show the proper installation location for each component for optimal performance.

HOW TO:

- 1. Locate the Sealed-In-Place (inoperable) rating for your door.
- 2. Determine the maximum allowable drop for your opening (i.e. -1 db). Note: the numbers are represented as negative numbers as they will decrease your inoperable rating by the number shown (i.e. 45 using a –1 kit will decrease the inoperable rating from 45 to an operable of 44)
- 3. Find a number in the column below your door's inoperable rating that will keep your opening in the allowable range.
- 4. Select a kit (or one of the kits given if Alternate Kits are shown), place it on your Purchase Order and add your opening size in inches (i.e. a 3/0 x 7/0 opening will be ordered as a 3684).

Item Number	Sealed-In-Place Door STC Rating					
	58 to 54	53 to 49	48 to 46	45 to 43	<42	
PEMKOSTCSET-1A Alternate Kits: 1B, 1C, 1D, 1E		-2	-2	-1	0	
PEMKOSTCSET-2C	-3	-2	-2	-1	0	
PEMKOSTCSET-2D Alternate Kits: 2A, 2B	-3	-2	-1	-1	0	
PEMKOSTCSET-2E	-2	-2	-1	-1	0	
PEMKOSTCSET-3A		-2	-1	0	0	
PEMKOSTCSET-3D		-2	-1	0	0	
PEMKOSTCSET-3E	-2	-2	-1	0	0	
PEMKOSTCSET-3B				0	0	
PEMKOSTCSET-4A	-3	-2	-1	0	0	
PEMKOSTCSET-4B	-3	-2	-1	0	0	
PEMKOSTCSET-4D	-3	-2	-1	0	0	
PEMKOSTCSET-4E	-2	-2	-1	0	0	

NOTE: A seal set cannot increase the sealed-in-place rating; a zero drop is the best performance any seal set can provide.

SIROCCO SERIES

For Sliding Panels up to 176 lbs.

Manufactured by P.C. Henderson

Right Hand SIRRH Shown Above and Below

The Sirocco system is a quiet, user friendly, self closing system which brings the door gently to a close.

The integrated hydraulic soft stop brings the door to a safe and cushioned close making it ideal for disabled access systems or public areas. The internal door brake can also be adjusted to allow the user to dictate the speed of opening preventing damage to the door and system.

Configurations:

• Single

Installations: • Side Wall Mount

Features:

- \cdot Self closing system for a single door from 311/2" to 471/4" wide and up to 176 lbs.
- Interior applications only
- · Comes complete with a hydraulically controlled soft close feature
- Adjustable closing speed
- Door brake to reduce opening speed to prevent damage to the door and system
- Optional hold open unit giving adjustable time delay before self closing
- Operational between temperature ranges of 50 to 104 degrees Fahrenheit
- 2 year warranty
- Meets ADA push force requirements

Sirocco Series Kits Include:

- 1 ea Track 86.61" long
- 1 ea Leading hanger
- 1 ea Trailing hanger
- 1 ea Hydraulic Control Unit
- 1 ea Closing brake rack
- 1 ea Opening brake rack
- 1 ea Power spring mounting bracket

PEMKOMATIC[™] SLIDING DOOR OPERATOR

Automates Sliding Doors

Our PemkoMatic[™] (PSLIDE) low energy automatic door operating system offers versatile electromechanical solutions for manual sliding doors, featuring convenient multi-access options including a wave-to-open sensor, push button, or keypad. Designed to fit seamlessly with both pocket and sliding doors, it is ideal for new installations as well as retrofitting existing openings. The system features a sleek cover, combining functionality with a clean, aesthetically pleasing design.

Installations:

- Overhead Mounted Sliding Systems
- Side Wall Mounted Sliding Systems

Features:

- Sliding Door Types: Barn Door and Pocket Doors
- 36" L x 2.5" W x 3" H
- Mounts to header
- Optional adapter bracket available for non-header installations
- · Recess into the wall for full-opening width access
- · Cover and track can be cut to size
- 330 lb. per door weight capacity, supports door widths up to the maximum door weight capacity
- Easy-to-use controls
- New construction or retrofit
- · Designed for smooth and silent door movement
- Two 20" tracks, additional tracks are needed for doors wider than 40"
- Field Reversible (Left-hand supplied)
- Customizable settings
 - Green/Auto Mode: Ideal for everyday use with open-assist enabled and the door unlocked
 - Blue/Hold Open Mode: Keeps the door fully open by default for convenience
 - Red/Lock Mode: Open-assist is disabled, the door is locked, and access is only available through a keypad or door activator

Finishes:

- Black
- White

ADJUSTABLE ECO-V™ TOP THRESHOLDS

- Furnished with concealed, weather-sealed mounting screws and adjustment mechanism
- Eco-V[™] seal adjusts to overcome swelling and/or shrinking of door and floor and eliminates need for shoe or sweep

249_V AVAILABLE FINISHES: A, D

AVAILABLE LENGTHS: 36", 72"

- Furnished with Eco-V[™] (V) insert. Gray replacement Eco-V[™] is **PV64GR** (see Weatherization Products section)
- Eco-V™ replacement "foot" insert is **EV63GR**
- · Pre-assembled for easy installation and adjustment

250_V

AVAILABLE FINISHES: **A**, **D** AVAILABLE LENGTHS: **36", 72"**

ECO-V[™] TOP THRESHOLDS

• Eco-V[™] (V) top creates a seal at the bottom of the door, eliminating the need for door sweeps or door shoes

206_V

AVAILABLE FINISHES: A, D

Gray replacement Eco-V™ is **EV22GR** Black replacement Eco-V™ is **EV22BL**

• Eco-V[™] feet replacement insert is **EV12GR**

208_V

AVAILABLE FINISHES: A, D

Replacement Eco-V™ is EV15BL or EV15GR

RESIDENTIAL SADDLES

- Use a door bottom shoe or sweep with these thresholds to seal out the elements
- · Made of sturdy extruded aluminum
- Replacement Eco-V[™] feet (where applicable) is **EV12GR**

Pemko Residential Thresholds

BUMPER THRESHOLDS FOR OUTSWING DOORS

• In the closed position, the door butts up to bumper seal on threshold creating a seal against the elements

149_T

AVAILABLE FINISHES: **A**, **D** REPLACEMENT INSERT: **T5 (BL)**

2051_T AVAILABLE FINISHES: A, D REPLACEMENT INSERT: T5 (BL)

SQUAREBACK THRESHOLDS

- Replacement Eco-V[™] feet (where applicable) is **EV12GR**
- Interior support leg flushes with interior jamb in application, allowing flooring to squarely abut threshold
- Ideal for tall terra cotta, plush carpet or stone paver entry applications for smooth transition

2052_

RESIDENTIAL MILLWORK SILLS

- Sills for use with standard $4^{5}\!\prime_8$ " jamb width with easy snap-on extention for jambs as wide as $8^{3}\!\prime_4$ "
- For fabrication options for adjustable or fixed substrate sills, such as horning or sidelite mullion notching, contact Pemko Customer Service
- Residential Sills are designed specifically for the pre-hung door market. They are furnished un-drilled and without screws or nails
- Adjustable up to ¼" to compensate for uneven door bottoms and sub-sill level changes. Two-part zinc plated steel stud shoulder screw joins a long-barreled, zinc plated steel T-nut for superior stability and long-lasting reliability
- PemkoPrene (PK) moisture barrier prevents water intrusion. Design of PemkoPrene (PK) bulb configuration keeps constant pressure between aluminum cap and aluminum extrusion at any level of adjustment (bulb shown compressed). Replacement insert is PK74BL
- · Available in standard sizes 32.5", 36.5", and 73.75"

ADJUSTABLE ALUMINUM TOP SILLS
